### DETAILED ACTION

The amendment filed on 1/12/09 has been entered and the remarks therein have been considered.

#### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yahagi et al. '403 in view of Tyrell '904.

Yahagi et al. '403 discloses a hammer drill having a tool receptacle 3 for holding a tool 1 comprising a hollow recess at one end for tool insertion and an impact opening at an opposite end, a plurality of web shaped drivers 17 cooperating with the tool 1, a plurality of locking elements 11 cooperating with grooves 16, wherein the tool has a

conical beveled end, and an impact piston 15 having an end for impacting the tool 1 and guided by an impact guide of a larger diameter than the impact piston and inherently having a tolerance wherein fluid can flow therebetween, at least to some degree.

Yahagi et al. '403 lacks the tool holder having a stop for an end of the tool. Tyrell '904 discloses a similar tool comprising a tool holder 18 with a portion 52 having a beveled stop 64 for abutting an end portion of a tool 20 (Note: Fig. 2). In view of the teachings of Tyrell '904, it would have been obvious to one skilled in the art to provide the tool holder of Yahagi et al. '403 with a frustoconical stop in order to limit the axial movement of the tool.

### ***Response to Arguments***

4. Applicant's arguments filed on 1/12/09 have been fully considered but they are not persuasive. Applicant argues that the prior art fails to teach and/or disclose the claimed invention of a tool holder having a stop surface on an inner wall thereof in the area of the impact opening. The tools of Yahagi and Tyrell fail to individually disclose this. However, it the collective teachings of the references that render the invention obvious. The tool of Yahagi discloses substantially the invention absent the stop on the holder. Tyrell teaches that this is well known by virtue of the stop surface on the tool holder/bushing which is contacted by an end of the tool at a location of an impact opening

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
